

AGM 2025 Report

My role at ANKORS is to support people who are living unhoused, providing outreach and simply meeting them where they're at. I support people who engage in substance use by providing harm reduction and safer substance use education, I support all people no matter their age, gender or current situation. By providing support as a peer with lived experience, I help people bridge gaps between individuals and the care they need; especially for those facing barriers due to stigma, poverty, addiction, mental health challenges, or systemic discrimination.
